To Whom It May Concern,

I am Rita Touma, Account Manager at Kingsmen Agency. I am writing this letter to recommend Namitha Sunil for the MSc in Data Analytics program offered by your University. It is an honor to recommend Namitha to anyone who wants great results as she always ready to go the extra mile to get the job done.

Namitha joined Kingsmen Agency as a Web Developer Intern in September 2020 and was quickly hired as a full-time employee in January 2021 in a very short time as she always managed to deliver better than expected results. I got the opportunity to train and work very closely with Ms. Namitha as she had very little work experience in the industry.

We've worked on a variety of projects over the years including one of the biggest projects that the company has ever received. I have been impressed with the way she works. During her first few weeks, she used to attend the daily team meetings, watch what was happening and often ask questions to get a bottom-up understanding of our workflow. She slowly started to take up more responsibilities which improved the overall productivity of the team. She does what she says even if the solutions may seem unattainable to some, the go-getter attitude in her always knew how to get things done and come back with top-notch work.

Anyone who has had the opportunity to work with Namitha can attest to her efficiency and will be truly grateful for what she can do to help them both succeed. Namitha is a highly energetic out-of-the-box thinker who is always willing to help others achieve their goals. She is an expert in her field with the ability to analyze any problem that may come her way and is always prepared to do whatever is necessary to reach a solution.

I would like to recommend Namitha for a place in the Masters in Data Analytics course. Our agency is very excited to see her grow into a more brilliant individual and would like to wish her all the very best for her future.

Thanking You

Sincerely

RITA TOUMA
