

Date: January 4th, 2021

From: Lock and Stock Technologies FZCO

Subject: Lock&Stock Internship Recommendation Letter

To whomever it may concern,

This letter is to confirm that **Namitha Sunil** worked at Lock&Stock as a founding member of our Product Development Team as part of Technology for the period stretching 10th June 2020 till 10th December 2020 as a **Web Developer**. During her time here, Namitha performed an exceptional job in whatever task she was assigned.

When we hired Namitha, we were 3 months into work from home protocols, and she was involved in our overall Technology Department development. Namitha performed as a rockstar across various projects including the Company Website redesign and University Counsellors Portal that has had a direct impact to the company's revenue for the year. She also played a vital role in working with vendor partners to ensure product quality was met and supported the marketing team by implementing new features to our web platforms.

, and I do not think anyone at the company would disagree with the statement that she played a significant role in setting us up for all the success we have experienced.

We will miss her.

Mustafa Zubair Ahmed
